***Preliminary Amendment Acknowledgement***

*Receipt is acknowledged of preliminary amendment filed on 2-9-2004.*

***Allowable Subject Matter***

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance.

Independent claim 1, more particularly define the structure of a magneto-optical recording medium of domain-wall displacement type wherein a floating magnetic field from surrounding portion that operates on a recording/reproducing portion is suppressed. The medium includes a displacement layer in which domain walls are displaced, a memory layer, a switching layer between the displacement layer and memory layer with Curie temperature lower than that of displacement layer and memory layer, and the medium also includes a magnetization compensation layer with a composition such that iron-family-element sub-lattice magnetization is dominant at room temperature. These particulars, combined with remaining claim elements are not suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
